# Renzil Rodrigues

***Technical Architect | Process Automation Engineer | AI & Content Strategist***

renzil.digispec@gmail.com | +91-7259540700 | LinkedIn

A versatile professional with 6+ years at Swiggy leading innovations across customer care content, training systems, process automation, and AI-driven backend solutions.

I specialize in building scalable architectures (LAMP/MERN), developing AI/NLP models, and transforming manual processes into optimized workflows — while maintaining a strong foundation in content strategy and user-centric communication.

Currently focusing on AI automation, backend engineering, and technical content enablement for businesses aiming to scale smartly and efficiently.

## Core Strengths

- Process Automation and Engineering
- AI Solutions (LLMs, NLP, ML)
- Content Strategy and Knowledge Management
- Scalable Backend Architecture (LAMP/MERN stacks)
- User-Centric Product Design (UI/UX focus)
- Data Modelling, Visualization, and Analysis

## Technical Proficiencies

- **Languages/Frameworks:** Python, Node.js, PHP, JavaScript
- **Stacks:** LAMP Stack, MERN Stack
- **Databases:** MongoDB, MySQL, Snowflake, PostgreSQL
- **Tools:** Power BI, G-Sheets, Looker Studio, Figma, Canva
- **Platforms:** Kafka, REST APIs, Docker (basic)

## Education & Certifications

- **Bachelor's Degree in Commerce**
  St. Aloysius College, Mangaluru (2018)
- **Advanced Prompt Engineering Techniques -** LinkedIn (2024)
- **Career Essentials in Data Analysis -** Microsoft (2024)
- **Data Visualization, AI Automation Specializations** — Self Learned)

## Projects

- **Resolute Web App:** Backend system serving 8K+ users daily for customer query resolution.
- **Pattern Detection Models:** Deployed ML models for operational anomaly detection.
- **Audit Bot (In Progress):** Real-time auditing of CX agent interactions using LAMP + PostgreSQL.

## Professional Experience

***Lead Process Automation Engineer***
Swiggy | Nov 2024 – Present

- Designed and deployed automation frameworks saving hundreds of man-hours across customer care workflows.
- Built AI/NLP models for real-time escalation prevention and customer intent detection.
- Developed backend services using LAMP/MERN stacks optimizing over 8000+ daily user interactions.

***Process Automation Engineer***
Swiggy | Oct 2023 – Nov 2024

- Led the creation of scalable APIs integrating Google/Microsoft Workspaces and Snowflake.
- Transitioned legacy content and training workflows into automated pipelines.

***Asst. Lead – Training & Content***
Swiggy | Oct 2022 – Oct 2023

- Designed knowledge management systems impacting 5000+ agents.
- Created data-driven content strategies improving customer resolution speed by 4%.
- Introduced basic automation into hiring and training processes.

***Senior Training Specialist***
Swiggy | Sep 2020 – Oct 2022

- Conducted “Train the Trainer” programs and scaled SOP knowledge transfers across partners.
- Integrated feedback-driven updates to dynamic process documentation.
